• The PIPE–High–Tech Entrepreneurial Training

treinamento-pipe@fapesp.br

The **PIPE–High–Tech Entrepreneurial Training**, offered by FAPESP, aims to assist companies funded through FAPESP's **Innovative Research in Small Businesses** program (PIPE in the Portuguese acronym) to develop a robust business model. The goal is to promote sustainable commercial development of the innovative products and services originated from FAPESP PIPE's research projects, generating significant business results. The training methodology is based on Steve Blank's Customer Development and Osterwalder and Pigneur's Business Model Canvas applied to high-tech innovation, similarly to the I-Corps program of the US National Science Foundation.

The São Paulo Research Foundation, FAPESP, has been funding small business research since 1997. The PIPE program focuses on **Innovative Research in Small Businesses**, targeting from startups to medium companies with less than 250 employees. Similarly to the NSF SBIR (Small Business Innovation Research) program, FAPESP's PIPE is divided in two phases. Phase 1 supports proof-of-concept or feasibility assessments, with a duration of up to 9 months. Phase 2 supports the development of the research required to develop the process or product, with a duration of up to 24 months. More than 1,500 PIPE grants have been awarded and since 2013 FAPESP has been awarding approximately 3 grants per week, with a steady growth in the yearly number of awardees.

The PIPE–High–Tech Entrepreneurial Training which starts in October 2016 is the second course FAPESP offers this year to its PIPE Phase 1 startups. This time, 56 candidates responded to FAPESP's announcement of opportunity for this training, a major increase of 33% over the first course. In each program, FAPESP selects 21 teams, based on the quality of their proposals and the benefits they could obtain from participating. Each team is composed of three members. Two of them are nominated by the startup: the Principal Investigator and the Entrepreneurial Lead person for the company. The third member, the Mentor, is assigned by FAPESP from a pool of highly experienced, successful high-tech executives in the State of São Paulo, Brazil.

The training is organized in 4 phases. In Phase 1, the companies prepare their initial business canvas. In Phase 2, the 21 teams will work at FAPESP with the instructors during three days and learn how to interview customers and incorporate their feedback into their businesses. In Phase 3, the teams will conduct dozens of customer interviews in a structured way, adapting their business model as they progress, and have online classes and videoconference sessions with FAPESP instructors. In Phase 4, the teams will meet again at FAPESP in a live session for their final oral presentations.

The training program is based on the Customer Discovery methodology, which is an iterative process of getting out of the office/lab, going to the market to interview potential customers, partners, and competitors, to understand their needs, problems, and difficulties. After each group of interviews, the team evaluates whether the new understanding of the customer needs validates or invalidates the components of its business model. When a team detects that its hypothesis is not valid, they modify the existing business model. This iterative process continues until the team achieves a match between the product/service being offered and the needs of the market. This correspondence is called *Product x Market fit*.

The program will not only help the 21 startup in enhancing their business capabilities, but also develop, within the State of São Paulo, the expertise on how to apply modern startup engineering methodologies for the development of prosperous high-tech companies.

• The São Paulo Research Foundation

FAPESP is a public foundation funded by São Paulo taxpayers to promote the development of science and technology in the state, by supporting research projects in institutions of higher education and research, official or private, which are selected by a rigorous system of analysis based on the peer-review process.

São Paulo has a population of 44 million and generates 32% of Brazil's GNP. Under the state Constitution 1% of all state taxes are appropriated to fund FAPESP. The stability of the funding and the autonomy of the foundation allow for an efficient management of the resources that has had a sizable impact: while São Paulo has 22% of the Brazilian population and 30% of the scientists with a doctorate in the country, the state responds for 45% of the country's scientific articles published in international journals.

The effectiveness of research carried out in São Paulo is the combined result of several factors that include the quality of the state's universities and institutes, the productivity of its researchers, high rates of participation by private, São Paulo-based companies that function within the state's R&D outlays, São Paulo's outstanding infrastructure, and the existence of FAPESP, a well-designed state research-sponsoring agency governed, maintained by its directors with excellence and with autonomy over the past half century.

Within this context, in 2015 FAPESP applied 642.5 million in \$ purchasing power parity (PPP) in scholarships and grants.

In accordance with the Foundation's funding objectives, 40% of expenditure was earmarked for advancing knowledge, 8% was dedicated to supporting research infrastructure and 52% was allocated to supporting application-driven research.

FAPESP works in close contact with the scientific community: all proposals are peer reviewed with the help of panels composed of active researchers from the specific area. Many times scientists in São Paulo submit proposals for programs to the foundation which are carefully analyzed and, if deemed strong in academic terms, are shaped by the foundation into research programs that will constitute a set of related research projects in a given area.

Since FAPESP's mandate is to foster research and scientific and technological development in the state, ideas for programs that couple world class research with contributions that will impact social problems are welcome.

• **Innovative Research in Small Businesses** **Aims and Objectives**

FAPESP's Innovative Research in Small Businesses Program (PIPE), established in 1997, aims to support the development of innovative research projects carried out in small businesses, i.e., companies with up to 250 employees, in the State of São Paulo. Centered on significant scientific and technological problems that have a high potential for commercial or social return, the projects are carried out by researchers who have formal links to the small businesses or who are associated with them for the implementation of the project.

The FAPESP PIPE objectives are:

- To use technological innovation as an instrument to increase the competitiveness of small companies;
- To create conditions to enhance the research system's contribution to economic and social development;
- To foster an increase in private investment in technological research;
- To enable the collaboration of small businesses with academic researchers on innovation projects;
- To contribute for the establishment of a culture that values research activities within business environments, technological innovation within small companies, and the employment of researchers in the private sector.

An electronic engineer and a physicist, Brito Cruz is a professor at the Gleb Wataghin Physics Institute, of the State University of Campinas (Unicamp), where he was the rector from 2002 to 2005.

He graduated in electronic engineering at the Aeronautics Technology Institute of (ITA in the Portuguese acronym). He took a master's degree and a doctorate at Unicamp's Gleb Wataghin Physics Institute. He has been a professor at the Unicamp's Physics Institute since 1982. Presently is a full professor at the Quantum Electronics Department.

Brito Cruz was a visiting researcher at the Quantum Optics Laboratory at the Università di Roma, at the Femtosecond Research Laboratory at the Université Pierre et Marie Curie, and a resident researcher at the AT&T's Bell Laboratories, in Holmdel, New Jersey. At Unicamp he was the Director of Unicamp's Physics Institute from 1991 to 1994 and from 1998 to 2002; Pro-rector for Research from 1994 to 1998, and Rector of the university from 2002 to 2005. He was the the President of FAPESP from 1996 to 2002.

Brito Cruz is a member of the Brazilian Academy of Sciences and a Fellow of the American Association for the Advancement of Science. He received the Ordre des Palmes Academiques de France, the Order of the Scientific Merit from the Federative Republic of Brazil and the Order of the British Empire, Honorary (OBE) in 2015.

Bachelors in Computer Science (USP, 1990), Bachelors in Music (UNESP, 1992), PhD and post-doc in Computer Science (University of Illinois at Urbana-Champaign, 2000).

Kon is Full Professor at the Department of Computer Science at the Institute of Mathematics and Statistics at the University of São Paulo and recipient of the CNPq Research Fellowship.

Works in the field of Computer Science, having published over 120 peer-reviewed papers in various themes around Software Development. His main field of research is Distributed Systems and Middleware, area in which he received the “10-Year Best Paper Award” in the ACM/IFIP/USENIX International Middleware Conference in 2010.

He also carries out research in the fields of Software Engineering, Free and Open Source Software, Computer Music, and Innovation and Technological Entrepreneurship. In 2013 he was Visiting Professor at the Technion, Israel, where he conducted research on Software Startup Ecosystems and Digital Entrepreneurship.

Kon is a former international Director of the Open Source Initiative (OSI) and, currently, is the Editor-in-Chief of the SpringerOpen Journal of Internet Services and Applications.

São Paulo Research Foundation – FAPESP

Rua Pio XI, 1500 – Alto da Lapa – São Paulo – CEP 05468-901

fgrynszpan@fapesp.br

www.fapesp.br/en

Received the degree of Electronic Engineer from the Universidade Federal do Rio de Janeiro(1966), M.Sc. in Electrical Engineering from the Coordenação dos Programas de Pós-Graduação de Engenharia-COPPE/UFRJ,(1967) and Ph.D in Biomedical Engineering from the University of Pennsylvania,(1971). Grynszpan was the head of the Department of Biomedical Engineering (1973-1976) and became Full Professor of COPPE/UFRJ(1975).

He became the head of COPPETEC, in charge of the University projects to Industry and Government (1976-1985) and the head of the Technology Innovation Center (1985-1986), to commercialize the University research results. In 1987, he founded the Technological Park of Rio de Janeiro, with 73 companies specialized in IT and Telecom. He, then, became the President of Riotec, the company that managed the research activities of the park. He was elected as Vice President of The International Association of Science Parks (1986 to 1989).

Grynszpan founded and headed the Brazilian Association of Biomedical Engineering (1971), was a member of the Conselho Técnico Científico of CAPES/MEC (1975) and Member of the Board of Conselho Nacional de Desenvolvimento Científico e Tecnológico (CNPq) from 1998 to 2002.

In 1989, he became the President of Motorola in Brazil, where he stayed for ten years and was responsible for bringing and installing Motorola's manufacturing facilities in Jaguariuna, São Paulo. In this plant, Motorola manufactured all cellular phones, radios and pagers sold in Brazil and exported to Latin America.

He became Vice President of Abinee – the Brazilian Electronic Industrial Association, until 2001, Member of the Board of Trustees of FIA – Fundação Instituto de Administração,(2000-2006) and Director of Anpei, the Brazilian Association of Innovative Enterprises, until 2008.

He is a Visiting Professor of the MBA Program of the Fundação Instituto de Administração, Director of the Technology Department of the Centro das Indústrias de São Paulo (CIESP), an organization that supports 8,500 industries in the state of São Paulo, and Member of CONIC – the Council of Innovation and Competitiveness of FIESP – the Federation of Industries of the State of São Paulo.

Grynszpan works as business consultant, specialized in innovation, commercialization of University research and entrepreneurship in Brazil and in the international market. He is now working as a consultant to the University of Virginia.

Bachelor's degree in Telecommunications Engineering (1970) and Master's degree in Electrical Engineering (1972) from Pontifical Catholic University of Rio de Janeiro. Graduated from Corporative Governance Brazilian Institute as Administrative Counselor (2009).

Served as a college professor. Former President (1990-1994) and currently Emeritus Member of Telecommunications Brazilian Society.

Worked at CPqD (Telecommunications R&D Center), since its creation (1976), in several areas: digital transmission, optical communication, microelectronics, technological and strategic planning.

TELEBRÁS R&D Director (1995-1998), CPqD's President (1998-2015) and CEO of CPqD Technologies&Systems Inc. (2000-2015). During his mandate CPqD created technology based startups with manifold business model in several areas: next generation network, optical communication systems, telecommunications clearing services, radio communication systems, optical sensors, fraud detection and prevention services, integrated photonics devices.

Has been President of the Administrative Board of Telesc, Telebahia, Padtec, Trópico, Sistel, member of the Administrative Board of Telergipe, Algar, Cleartech, Telebrasil, member of Fórum Campinas Foundation Board of Trustees and Director at Telebrasil.

Presently is startup Mentor, member of Fiesp Competitivity and Innovation Superior Council and Director at Fiesp Telecommunications Division. Co-founder of Brazil iCorps Institute.

Teaching Assistant

Rafael Almeida Mattos

Brazil

Technologist in Computer Networks at Modulo Faculty

Escola Politécnica da USP

rafmat@usp.br

He worked in retail companies in the manufacturing industry, at the technical support area and IT coordination. During 1999 and 2005 he participated in administrative systems deployments projects, installation projects and expansion of electronic fund transaction networks, point of sale terminals and logistics.

He is currently a member of the web development team in the Information Services Department at Polytechnic School of Engineering in University of São Paulo. He participates in engineering education projects in the role of technical support for videoconferencing and distance learning.

Course Syllabus

Course Dates

Kickoff workshop	October 24-26, 2016
Online classes	October 31, November 07, 14, 21 and 28
Closing workshop	December 05 and 06

Course Expectations

Each team member should commit to attending every planned session of the program. Each team must have two members that can commit to class time plus approximately 15-20 additional hours per week, for the full seven weeks of the program, on customer discovery and exercises outside of class. Additional team members must commit to 6-8 hours a week.

Course Description

Customer Discovery is an iterative process of physically getting out of the building to interview potential customers and stakeholders to understand their problems and pain points in the market and in society. These interviews, or experiments, lead to real-world learnings and insights that validate or invalidate key components of the business model, often leading to pivots.

This course will provide teams with real-world, hands-on learning experience with customer discovery and successfully transferring knowledge into products and processes that benefit society. The entire team will engage with industry. You and your team will spend your time talking to and learning from customers, partners and competitors, and learning how to deal with the chaos and uncertainty of commercializing innovations and creating ventures.

This course is about getting out of the building. You will be spending a significant amount of time outside the building, talking to customers and testing your hypotheses about what they want in products and services. We will spend our limited class time on what you learned from talking to customers, not what you already knew coming into the course. Teams should be striving for 15 interviews per week, for a total of 100 interviews by the end of the course.

Class Culture

We have limited time and we push, challenge, and question you in the hope you will quickly learn. We will be direct, open, and tough – just like the real world. We hope you can recognize that these comments aren't personal, but part of the process. We also expect you to question us, challenge our point of view if you disagree, and engage in a real dialog with the teaching team. This approach may seem harsh or abrupt, but it is all part of our wanting you to learn to challenge yourselves quickly and objectively, and to appreciate that as entrepreneurs, you need to learn and evolve faster than you ever imagined possible.

Course Syllabus

Additional Resources

1) These short videos from Steve Blank provide helpful tips and examples for preparing for your customer interviews.

<https://vimeo.com/groups/204136/videos>

Pre-Planning Pt. 1	(4'55)
Interviews Pt. 1	(5'40)
Interviews Pt. 2	(3'49)
Asking the Right Question	(2'37)
Assuming you know what the customer wants	(1'56)
Understanding the Problem (the right way)	(3'22)
Customers Lie	(2'37)
The Distracted Customer	(3'12)
Engaging the Customer	(3'37)
Customer Empathy	(2'25)
The User, the Buyer & the Saboteur	(2'24)
Death by Demo 1	(2'18)
Death by Demo 2	(1'45)

2) For a more detailed explanation of Customer Development and the Lean Startup, here are some short videos of Steve Blank from the Kaufmann Founders School.

The Startup Owner's Manual

Steve Blank & Bob Dorf

Course Syllabus

Required Pre-Kickoff Assignments

Register for the free Udacity online course – How to Build a Startup (<https://www.udacity.com/course/ep245>) and watch the following lectures:

- Lesson 1: What we Now Know
- Lesson 1.5A: Business Models
- Lesson 1.5B: Customer Development
- Lesson 2: Value Proposition
- Lesson 3: Customer Segments

Highly Suggested Pre-Kickoff Assignments

The following assignments augment the required assignments, and should be used to provide a greater understanding of the material. At a minimum, we recommend that you scan these readings.

- **Business Model Generation** – pages 14-51
- **The Startup Owner's Manual** – pages 195-199
- **“12 Tips for Early Customer Development Interviews”** by Giff Constable:
(<http://giffconstable.com/2010/07/12-tips-for-early-customer-development-interviews>)

Required Deliverables for the Kickoff Workshop

1. A two-slide presentation. You *may* be called upon to present to the whole class and will *definitely* present to a group of peers and instructors in a breakout session. See the template provided on the following page.
2. Ten or more customer/industry contacts that you hope to interview on Day 2 of the Kickoff Workshop (October 25)

Course Syllabus

Presentation Template for the Kickoff Workshop

- Slide 1: **Title Slide**
 Team Name
 University or company logo
 Product or technology picture & description (1 sentence)
 Pictures & names of your team members

Slide 2: Populated Business Model Canvas

Download template from: http://www.businessmodelgeneration.com/downloads/business_model_canvas_poster.pdf

Use the questions in the image below to guide your answers – focus on Customer Segments & Value Propositions

Key Partners 6 Who are your key partners? Who are your key suppliers? What are you <i>getting</i> from them...and <i>giving</i> to them?	Key Activities 7 What key activities do you require? Manufacturing? Software development? Personal concierge service? Etc.	Value Propositions 1 What customer <i>problems</i> are you helping to solve? What customer <i>needs</i> are you satisfying?	Customer Relationships 4 How will you <i>get, keep and grow</i> customers?	Customer Segments 2 Who are your most important customers? What are their <i>archetypes</i> ? What job do they want you to get done for them?
	Key Resources 8 What key resources do you require? Financial? Physical? Intellectual property? Human resources?	What are key features of your product/service that match customer problems/needs?	Channels 3 Through which channels (sales, distribution, support) do you customers <i>want</i> to be reached?	
Cost Structure What are most important costs inherent in your business model? What is mix of fixed and variable costs?	9	Revenue Streams How will you make money? What is revenue model? What are pricing tactics?	5	

Kickoff Workshop: Schedule at-a-glance (All times are GMT-3)

Date	Time	Topic	Location
Thursday, October 20	2:00 pm - 4:00 pm	Kickoff meeting with all teams to review requirements, logistics, and to connect mentors to teams	Auditorium
Monday, October 24	8:00 - 8:30 am	Registration	Lobby
	8:30 - 9:00 am	Welcome & Introduction	Auditorium
	9:00 - 10:30 am	Lecture #1: Using Customer Discovery to Build a Business Model, Customers & Value Propositions	Auditorium
	10:30 - 11:00 am	Coffee Break	Lobby
	11:00 am - 1:00 pm	Team Introductions (21 teams: 3 min presentations/2 min comments)	Auditorium
	1:00 - 2:00 pm	Lunch	Lobby
	2:00 - 2:30 pm	Welcome & Introduction by FAPESP	Auditorium
	2:30 - 3:15 pm	Lecture #2: Best Practices for Customer Discovery Interviews	Auditorium
	3:15 - 4:30 pm	Workshop #1: Team Practice Interviews & Informal Office Hours	Breakout Rooms
	4:30 - 5:00 pm	Mentor/PI/EL Workshops	Breakout Rooms
5:00 - 5:30 pm	LPC Training	Auditorium	
Tuesday, October 25	All Day	Customer Interviews – in person at customer location	Sao Paulo & surrounding area
	8:00 - 9:30 am or 4:30 - 6:00 pm	Office Hours (20 min sessions – teams will choose one slot based on their interview schedules)	Breakout Room
Wednesday, October 26	8:00 - 8:30 am	Welcome Back, Q&A, Discussion	Council Room
	8:30 - 9:30 am	Lecture #3: Channels	Council Room
	9:30 - 10:30 am	Team Presentations (3 teams each in 2 rooms: 15 minute presentations/comments)	Breakout Rooms
	10:30 - 11:00 am	Coffee Break	Lobby
	11:00 am - 12:00 pm	Team Presentations (3 teams each in 2 rooms: 15 minute presentations/comments)	Breakout Rooms
	12:00 - 1:00 pm	Lunch	Lobby
	1:00 - 2:30 pm	Team Presentations (5 teams each in 2 rooms: 15 minute presentations/comments)	Council Room
	2:30 - 3:00 pm	WebEx Training	Council Room
3:00 - 4:30 pm	Optional Office Hours	Breakout Rooms	

Online Classes: Assignments

Required Assignments

You should watch all of the videos in the “*How to Build a Startup*” course (<https://www.udacity.com/course/ep245>). You can watch these at your own pace, but must have completed by the dates shown below.

By October and November

- Lesson 4: Channels
- Lesson 5: Customer Relationships
- Lesson 6: Revenue Models
- Lesson 7: Partners
- Lesson 8: Resources, Activities, and Costs

Additional Assignments

The teaching team may assign additional short readings or tasks throughout the course as deemed necessary based on the progress of teams.

Online Classes: Schedule at-a-glance (All times are GMT-3)

Date	Time	Topic
Monday, October 31	1:30 - 2:00 pm 2:00 - 4:00 pm 4:00 - 5:00 pm	Test WebEx Team Presentations Teams present their business model canvas in three concurrent tracks. Each team is allotted 12 minutes total to include 10 minutes for presentations and 2 minutes for teaching team comments. Lecture #4: Problem Solution Fit Value Proposition Canvas: Customer Profile & Value Map, Customer Pains/Gains
Monday, November 7	1:30 - 2:00 pm 2:00 - 4:00 pm 4:00 - 5:00 pm	Test WebEx Team Presentations Teams present their business model canvas in three concurrent tracks. Each team is allotted 12 minutes total to include 10 minutes for presentations and 2 minutes for teaching team comments. Lecture #5: Customer Relationships & Revenue Models
Monday, November 14	1:30 - 2:00 pm 2:00 - 4:00 pm 4:00 - 5:00 pm	Test WebEx Team Presentations Teams present their business model canvas in three concurrent tracks. Each team is allotted 12 minutes total to include 10 minutes for presentations and 2 minutes for teaching team comments. Lecture #6: Key Partners
Monday, November 21	1:30 - 2:00 pm 2:00 - 4:00 pm 4:00 - 5:00 pm	Test WebEx Team Presentations Teams present their business model canvas in three concurrent tracks. Each team is allotted 12 minutes total to include 10 minutes for presentations and 2 minutes for teaching team comments. Lecture #7: Lessons Learned Presentations & Story Videos Overview and directions for the final course deliverables
Monday, November 28	1:30 - 2:00 pm 2:00 - 4:00 pm 4:00 - 5:00 pm	Test WebEx Team Presentations Teams present their business model canvas in three concurrent tracks. Each team is allotted 12 minutes total to include 10 minutes for presentations and 2 minutes for teaching team comments. Lecture #8: Business Model Fit Resources, Activities and Costs: how to build and validate the rest of your business model

Lessons Learned Workshop: Schedule at-a-glance (All times are GMT-3)

Date	Time	Topic	Location
Monday, December 5	8:30 am - 9:00 am	Welcome Back	Auditorium
	9:00 am - 10:30 am	Lecture & Discussion: Preparing Lessons Learned Presentation & What's Next	Auditorium
	10:30 am - 10:45 am	Coffee Break	Lobby
	10:45 am - 12:45 pm	Review Videos & Draft Presentations	Breakout Rooms
	12:45 pm - 1:45 pm	Lunch	Lobby
	1:45 pm - 4:30 pm	Individual Team Meetings Teams will be separated into 3 groups and assigned a 20 minutes time slot with an Instructor to discuss next steps and answer questions.	Breakout Rooms
Tuesday, December 6	8:00 am - 8:30 am	Registration	Lobby
	8:30 am - 9:00 am	FAPESP Introduction of Final Presentations	Auditorium
	9:00 am - 10:45 am	Team Presentations: 6 teams (10 min presentations/5 min comments)	Auditorium
	10:45 am - 11:00 am	Coffee Break	Lobby
	11:00 am - 12:30 pm	Team Presentations: 5 teams (10 min presentations/5 min comments)	Auditorium
	12:30 pm - 1:30 pm	Lunch	Restaurants around FAPESP
	1:30 pm - 3:00 pm	Team Presentations: 5 teams (10 min presentations/5 min comments)	Auditorium
	3:00 pm - 3:15 pm	Coffee Break	Lobby
	3:15 pm - 4:45 pm	Team Presentations: 5 teams (10 min presentations/5 min comments)	Auditorium
	4:45 pm - 5:15 pm	Closing Ceremony	Auditorium

List of selected companies

Ranking	Company name	FAPESP number	Mentors	Name of the project
1	Cybox Tecnologia	2015/22069-8	Alexandre Maurício	Inovações em navegação e visão computacional embarcadas para robôs móveis
2	Treevia Forest Technologies	2015/15563-6	Stefan Salej	Revolução tecnológica em inventários florestais: Desenvolvimento de um sistema integrado para monitoramento e mensuração florestal por meio de telemetria e escaneamento a laser por cabos
3	@Tech – Inovações Tecnológicas para a Agropecuária	2015/07855-7	Virgilio Marques dos Santos	BeefTrader: plataforma de inteligência de informações de mercado para a maximização do lucro de produtores e da indústria frigorífica
4	IDGEO	2015/22677-8	Cláudio Violato	Aplicação de técnicas multisensor orbital para detecção e caracterização das alterações espaço-temporal do vigor relativo de fitomassa em talhões canavieiros
5	Katleia Lab	2014/21574-8	Mauricio Benedetti	Serviço de diagnóstico capilar personalizado para a consumidora final
6	KartFly	2016/00576-8	Alberto Lanari Ozolins	Sistema de localização em ambientes fechados de alta precisão, com aplicação em corridas interativas de karts elétricos
7	Innolution Sistemas de Informática	2015/08412-1	Jorge Salomão Pereira	SIPRAD: Sistema de Planejamento Radioterápico
8	AGA – Consultoria e desenvolvimento de projetos técnico-científico	2015/22633-0	Marcello Pilar e Celso Barbosa	Obtenção de catalisadores automotivos usando como matéria-prima resíduos sólidos inorgânicos com alto percentual de cobre oriundos das indústrias de metalurgia, usinagem e fundição
9	ISGame	2015/08128-1	Wilson Nobre	Programação de games para o desenvolvimento do raciocínio lógico e prevenção do declínio cognitivo em idosos
10	Apis Flora Industrial e Comercial	2015/15963-4	Renato Toi	Determinação da eficácia e segurança de princípio ativo de origem natural e desenvolvimento de nanopartículas para tratamento de artrite reumatóide
11	Brax	2015/15825-0	Sergio Bergamini	Método e dispositivo para detecção de arco elétrico através de ultrassom
12	Smartbio Desenvolvimento Tecnológico	2015/16014-6	Carlos Calmanovici	Desenvolvimento de um sistema como serviço (SAAS) para o manejo integrado de doenças e pragas da soja por computação em nuvem e mineração de Big Data
13	DC Química	2015/13883-3	Christine Nogueira	Desenvolvimento de processo de caracterização de ramnolípídios: explorando os efeitos do balanço hidrofílico e hidrofóbico sobre a sua composição para aplicação na indústria cosmética
14	Selaz Indústria e Comércio de Aparelhos Biomecânicos	2015/08611-4	Ronald Dauscha	Fixador externo automático
15	Ecoplas Equipamentos Industriais	2016/00953-6	José Mauro Leal Costa	Desenvolvimento de reator fotocatalítico para tratamento de gases contaminados com compostos orgânicos voláteis
16	One Sports	2015/22596-8	Roberto Paranhos	Sistema de monitoramento cardíaco em grupo baseado em gamificação para jogadores de futebol
17	Insitu	2015/01067-7	Eduardo Giacomazzi	Medicina regenerativa utilizando queratinócitos e fibroblastos ou melanócitos para terapia celular em úlceras cutâneas de diferentes etiologias e vitiligo
18	Cis Biomoléculas	2015/16012-3	Lauro Moreto	Extratos padronizados de <i>Petroselinum crispum</i> - fonte potencial de ativos diurético, antimicrobiano e antiviral
19	Vendics	2015/08669-2	Valério Dornelles	Solução inteligente de auto-atendimento para fornecimento automatizado de refeições completas
20	Engrenar Tecnologia	2015/08244-1	Luiz Trivelatto	Greg: acessibilidade ao currículo na sala de aula
21	Ukkobox	2015/21719-9	Alexandre Bernardoni	Armazenamento multi nuvem privado e seguro de arquivos usando dispersão de dados e criptografia
